QUIZ 19 - ICS 321 Fall 2017

Today we learned how to make a trigger in MySQL.

Imagine a rule where a shipper can't have more than 3 different parts in transit.

Complete the following trigger code for the SP table to enforce this constraint.

Make sure your code is syntactically correct.

```
BEGIN
    SET
    IF
        SIGNAL SQLSTATE '45000'
        SET
    END IF
END
```
