QUIZ 29 - ICS 321 Fall 2017

Today we discussed a final database design for the toastmaster's project. The database application creates Toastmaster meeting agendas. The agendas are for meeting dates and contain toastmaster duty assignments and other meeting attributes, such as meeting theme and speech titles.

For Quiz 28 you designed tables for the database. For this quiz, draw a crow's feet style entity relationship diagram for your database containing tables for:

- Meeting_Dates,
- Meeting_Duties,
- Meeting_Attributes,
- Roster,
- Agenda_Duties, and
- Agenda_Attributes.
